

Automatic fish feeders by Betten

A complete range of automatic fish feeders for juvenile stages and hatcheries, known for quality, durability and precision. Three models cover the complete range, from initial feeding to post smolt.

Maxi

The feeder utilizes a screw mechanism for distributing feed and can be customized to fit most tanks and walkway solutions. Independent tests have shown that spreading the feed throughout the tank leads to better growth and less fin erosion.

PLC – Control for up to 96 feeder units

Automatic feeding for up to 96 feeders. In cooperation with Norwegian smolt farmers, Betten has developed a highly user-friendly PLC system, featuring overview or detailed images for each individual tank.

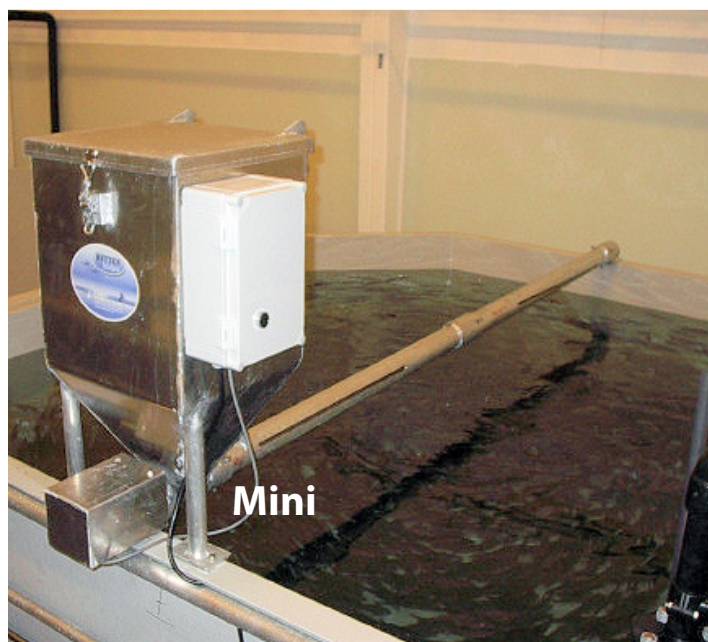

Feeding regimes are easily set. Possibility of percentagebased increase in feed quantity. Control directly on the unit or via PC or iPad.

BIO 
MARINE

The Betten Feeder is designed for feeding juvenile fish of all sizes. The feeder comes in three sizes, ranging from 20 to 2700 liters.

The Betten Automatic Feeders has long been the preferred choice of salmon producers in Norwegian aquaculture. With a legacy dating back to 1975, the Betten feeders have been continuously optimized to deliver exceptional performance and reliable feeding results.

Model	Maxi (S1)	Mini	Micro
Feeding capacity	73 kg/hour	5,2 kg/hour	1,65 kg/hour
Storage capacity	20-2700 liter	20-250 liter	20 / 50 liter
Size of fish tanks	Ø 5 meter and larger	Ø 3-5 meter	Ø 0-3 meter
Feeding tube	Ø 4"	Ø 3"	Ø 40 mm
Size feed	All sizes	All sizes	Up to 3 mm
Control unit	YES	YES	NO
PLC compatible	YES	YES	YES

Advantages of Betten Feeder

Proven performance for many years

- ▶ High quality - Robust design
- ▶ Easy to use - Simple operation
- ▶ Little waste - Reduces feed cost
- ▶ Large capacity - Precise output
- ▶ Reliable and durable
- ▶ Corrosion resistant
